

# Relocation of the Cytopreparatory Laboratory

## Possible delays in the Cytology turnaround times:

The Cytology laboratory will be relocating to the new Pathlab premises on the Hospital campus at 829 Cameron Road, on the 10<sup>th</sup> June 2016.

This move will involve the re-calibration of key diagnostic equipment. We anticipate a trouble free move with a minimal impact on our gynaecological and non-gynaecological workflow.

While we do not anticipate any problems we ask for your understanding and patience should our response time be affected.
