

SCHISTOSOMIASIS URINE SPECIMEN PATIENT INFORMATION SHEET

It is important to follow these instructions carefully to ensure your test results are accurate.

Preparation:

Three specimens need to be collected on three separate days.

Collection Procedure:

1. Collect urine specimen in the middle of the day (between noon and 3.00 pm) into a 600 mL bottle. **Prior to the collection drink a large volume of fluid & then complete 10 minutes vigorous exercise e.g. running or jumping up & down or running up & down stairs.**
2. The entire urine void at this time needs to be collected in the provided container.
3. Write your **name**, and **date and time of collection** on the specimen container.
4. Place specimen-container in specimen bag with copy of request form.
5. Drop off the specimen at your nearest available lab as soon as possible.

Your results can only be obtained from the requesting doctor
